Eluru,
01-04-2022

To
The Principal,
Sir C. R. Reddy College of Engineering,
Eluru.

Respected sir,

Subject: Request for Permission to Organize a Two-week value added course in CSE Department – Reg.

I am requesting your permission to organize a Two -week value-added program course in CSE Department. The Two -week value-added course will be conducted on "FUNDAMENTALS OF DRONE TECHNOLOGY" to IV B Tech CSE from **11-04-2022to 23-04-2022** and is aimed at providing a platform for students to expand their knowledge and understand the latest advancements and developments in that area.

I am confident that this Two -week value added course on**" FUNDAMENTALS OF DRONE TECHNOLOGY"** will be a great success and will contribute significantly to the overall growth and development of our students. So, grant your permission to proceed with the Two -week value-added course. I look forward to your positive response.

Thank you, sir.

ABOUT COLLEGE

Sir C.R.Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE).This college is permanently affiliated to JNTUK from the Academic Year 2017 -18.Since its inception in 1989, Sir C.R.REDDY College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and management. The last Two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community. Adhering to its core values, the institute gives top priority to ethical values and high standards and a commitment to value based education. We believe in working honestly and sincerely, in building trust and in maintaining a long lasting relationship with the society.

ABOUT DEPARTMENT

The Department of Computer Science & Engineering was established in the year 1989 along with the inception of college. The department is offering Under Graduate &Post Graduate programs in CSE &CST respectively. The intake for UG is 180 and for M.Tech CST are 18.The department is well equipped with more than 300 computers with state of the art latest configuration. The students can experience a great facility of a total networked environment. The department is using 10no's of high -end servers for fulfilling the requirements of the students competitive spirit to students for academic excellence.

ABOUT THE COURSE : Drone technology encompasses various types, including multirotor, fixed-wing, and single-rotor drones. They consist of components like frames, motors, flight controllers, sensors, and batteries. Drones have diverse applications, such as aerial photography, agriculture, infrastructure inspection, search and rescue, and delivery. Regulations govern drone operations for safety and privacy. Emerging technologies include sense and avoid systems, AI integration, and long-endurance capabilities. Future trends include urban air mobility and drone swarms.

RESOURSE PERSON:

Mr. B .Madhav Rao, Assistant Professor in Department of Computer Science and Engineering,
Sir C. R. Reddy College of Engineering
Email: madhavraob@gmail.com,
phone: +91 9949582856

OBJECTIVES OF THE PROGRAM:

- Understand the basic concepts and history of drone technology, including their evolution and applications.
- Identify and describe the essential components of a drone system, including propulsion, navigation, communication, and payload systems.
- Classify drones based on their size, capabilities, and applications, including a distinction between consumer and professional-grade drones.
- Learn the principles of aerodynamics and the physics of flight relevant to drone.
- Understand the regulatory frameworks governing drone operations, safety protocols, and ethical considerations.

LEARNING OUTCOMES:

- Demonstrate a comprehensive understanding of the operational principles and components of drone systems.
- Adhere to safety regulations and guidelines for responsible drone operation.
- Demonstrate the ability to operate a drone, including take off, landing, and navigation in controlled and uncontrolled environments.
- Apply drone technology for data acquisition, processing, and analysis in specific domains such as agriculture, surveying, or environmental monitoring.
- Develop the ability to troubleshoot common issues and perform routine maintenance on drone systems.

ELIGIBILITY:

- All IV-B.Tech Students
- **REGISTRATION FEE:**
- Students registering for the value added course are not required to pay any fee.

ABOUT RESOURSE PERSON:

- **Mr. B .Madhav Rao,** Working as Assistant Professor in department of Computer Science and Engineering, Sir C .R. Reddy College of Engineering. He has 4 years of experience in Sir C. R. Reddy college of Engineering. He had Published 12 international Journals. He had 3 conference papers published in International Journals and 5 national conferences. He has professional membership in IAENG.

PROGRAM REPORT

Name of the Event: A Two week value added course on "**FUNDAMENTALS OF DRONE TECHNOLOGY**".
Date: 11-04-2022 to 23-04-2022
Resource person: Mr. B. Madhava Rao Assistant professor, Department of CSE.
Contact no: 9949582856
Email id: madhavraob@gmail.com,
Name of the coordinator: Mr. V. Shariff Assist professor, Department of CSE.
Venue: CSE Seminar Hall, **SIR. CR REDDY COLLEGE OF ENGINEERING, vatluru.**

Learning Objectives:

- Understand the basic concepts and history of drone technology, including their evolution and applications.
- Identify and describe the essential components of a drone system, including propulsion, navigation, communication, and payload systems.
- Classify drones based on their size, capabilities, and applications, including a distinction between consumer and professional-grade drones.
- Learn the principles of aerodynamics and the physics of flight relevant to drones.
- Understand the regulatory frameworks governing drone operations, safety protocols, and ethical considerations.
- Explore the principles of drone navigation and control systems, including GPS, sensors, and autopilot systems.

Learning Outcomes:

- Demonstrate a comprehensive understanding of the operational principles and components of drone systems.
- Adhere to safety regulations and guidelines for responsible drone operation.
- Demonstrate the ability to operate a drone, including take off, landing, and navigation in controlled and uncontrolled environments.

- Apply drone technology for data acquisition, processing, and analysis in specific domains such as agriculture, surveying, or environmental monitoring.
- Develop the ability to troubleshoot common issues and perform routine maintenance on drone systems.

No.of Students Enrolled the Course: 192

To

The principal,

Sir C R Reddy College of Engineering,

Eluru.

Subject: Permission Request for Organizing an Enrichment Program on the "**Architecture modeling using Revit"** in the CIVIL Department – Regarding.

I would like to seek your approval for arranging a value-added program in the CIVIL Department. This program, focusing on **One week Programme on "Architecture modeling using Revit"**, is intended for the III/IV B Tech CIVIL section, scheduled from 15-09-2021 to 21-09-21 with the goal of offering students an opportunity to enhance their knowledge and stay abreast of the latest advancements in the field.

Having faith in the success of this Revit Architecture workshop, I believe it will significantly contribute to the students' overall learning and growth. Kindly provide your consent for the conduct of this valuable workshop. Your favorable response is eagerly anticipated

Thank you, sir.

About the institution

Sir C.R.Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE). This College is permanently affiliated to JNTUK from the Academic Year 2017-18.Since its inception in 1989, Sir C.R.Reddy College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and magnanimous management. The last two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community.

About the Department

The precise knowledge and skill will help to attain professional and personal goals. The department of civil engineering was started in the year 2009. UG Programme is designed for a broad spectrum of courses and for enriching students through a multidisciplinary approach for a well-rounded knowledge base and manageable skills.Well qualified and experienced faculty members form the department. They specialize in structural, geotechnical, environmental, etc and a few of them are pursuing Ph.D from various reputed universities in India . The faculty members contribute to academic development by presenting papers in international and national conferences.

About the course overview

INTRODUCTION TO Autodesk Revit Architecture A powerful building modeler that has changed the outlook of the building industry about computer aided designs. Enables you to use a single, integrated building information model to conceptualize, design, and finally document a project. Drawing sheets, 2D views, 3D views, and schedules.

Objectives of the course :

- ASIC CONCEPTS AND PRINCIPLES Envisage and develop a building model with actual 3D parametric building elements. A new approach to the architectural thought and the implementation process. 2D CAD platforms mostly use lines to represent all elements.
- Autodesk Revit Architecture project created using parametric building model
- Understanding the Parametric Building Modeling Technology A project Created using different interdependent parametric building elements.
- Learn industry-standard practices and techniques for efficient and accurate drawing creation and modification.
- creating a Building Model Using Parametric Building Elements Uses five classes of element: host, component, annotation, view, and datum.

Eligibility:

- IV/IV B.Tech Students

Registration Fee:

- Free of cost

Course overview: The APSSDC offers courses in Revit Architecture in both traditional classroom settings and online. Revit, created by Autodesk, is a Building Information Modeling (BIM) software utilized for specialized design, modeling, visualization, and documentation purposes..

Objectives of the Programme:

- REVIT for **architectural BIM Services** is improved design and visualization. It helps architects identify design flaws and adjust before the construction phase begins
- Another benefit of REVIT is its ability to strengthen stakeholder collaboration. It provides a shared modeling environment where architects, engineers, and contractors can work on the same building model
- This feature saves time and reduces the risk of human error. Additionally, REVIT improves construction planning and coordination, ensuring that all stakeholders are on the same page and that the construction process runs smoothly.
- Finally, REVIT helps to increase productivity and efficiency. The software has an intuitive user interface that makes it easy to use and navigate. REVIT also offers customizable templates and tools, allowing architects to tailor the software to their specific needs.

Outcomes of the Programme:

- It is used for Conceptual design.
- 3D parametric modeling.
- Modeling building components.
- Generating design documentation for fabrication or construction.
- Structural steel modeling and documentation.
- MEP fabrication modeling and detailing.
- Photorealistic 3D visualize

To

The Principal,
Sir CRReddy College of Engineering,
Eluru.

Respected sir,

Subject: Request for Permission to Organize a Five Weeks value added program in IT Department – Reg.

I am requesting your permission to organize a Five Weeks value-added program in IT Department.

The Five Weeks value-added program will be conducted on BLOCK CHAIN TECHNOLOGY to IV/IV-B.Tech (IT), A and B sections from 21-02-2022 to 31-03-2022 and is aimed at providing a platform for students to expand their knowledge and understand the latest advancements and developments in that area.

I am confident that this Five Weeks value added program on Block Chain Technology will be a great success and will contribute significantly to the overall growth and development of our students. So, grant your permission to proceed with the value-added program.I look forward to your positive response.

Thank you, sir.

About College:

Sir C.R.Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE).This college is permanently affiliated to JNTUK from the Academic Year 2017 -18. Since its inception in 1989, Sir C.R.REDDY College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and management. The last Two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to The student Community. Adhering to its core values, the Institute gives top priority to ethical values and high standards and a commitment to value based education. We believe in working honestly and sincerely, in building trust and in maintaining a long lasting relationship with the society.

About Department:

Information Technology is the most flourishing and extremely pervasive Discipline that is witnessing an unprecedented Innovation in Technologies for Communication, Computation, and Interactivity. The Information Technology Department in SIRCRRCOE started its journey in the year 2000 with an intake of 60 students. We now have strong Undergraduate Program with an annual intake of 120 students

About The Course:

Blockchain technology is an advanced database mechanism that allows transparent information sharing with in a business network. A block chain database stores data in blocks that
are linked together in a chain.

The goal of this Tutorial is to help you to learn BlockChain Technologies .The tutorial will guide you step by step through the analysis of a simple problem using Block Chain Technologies preprocessing, classification, clustering, association, attribute selection, and visualization tools. At the end of each problem there is a representation of the results with explanations side by side. Each part is concluded with the exercise for individual practice. By the time you reach the end of this tutorial, you will be able to analyze your programming skills with Block Chain Technologies using various learning schemes and interpret received results.

Course Outcomes:

- Student will be able to understand the fundamentals of blockchain technology.
- Apply knowledge of implementations of Bitcoin, Ethereum and Hyperledger.
- To develop solutions in the appropriate domains.

Resource Person:

Mr. G.Vihari.
Assistant Professor in the Department of IT

Objectives of the Program:

- To understand and appreciate of Blockchain Technology.
- The Importance of Fundamentals of Blockchain Technology.
- Application of Cryptography in Blockchain.
- To gain the awareness about the concepts of various implementations of blockchain technology. such as bitcoin, Ethereum, and Hyper ledger.

Course Contents:

- Fundamentals of Blockchain Technology.
- Benefits and limitations of blockchain.
- The bitcoin network.
- Elements of the Ethereum block chain.
- Smart Contract and Hyper ledger.

To
The Principal,
Sir CRReddy College of Engineering,
Eluru.

Respected sir,

Subject: Request for Permission to Organize a value added program in IT Department – Reg.

I am requesting your permission to organize a value-added program in IT Department.

The value-added program will be conducted on **Angular JS to II/IV B Tech (IT), A and B sections from 01-11-2021** and is aimed at providing a platform for students to expand their knowledge and understand the latest advancements and developments in that area.

I am confident that this value added program on Angular JS will be a great success and will contribute significantly to the overall growth and development of our students. So, grant your permission to proceed with the value-added program.I look forward to your positive response.

Thank you, sir.

Sincerely,

HOD ,

AboutTheCourse:

AngularJS is a very powerful JavaScript library. It is used in Single Page Application (SPA) projects. It extends HTML DOM with additional attributes and makes it more responsive to user actions. AngularJS is open source, completely free, and used by thousands of developers around the world. It is licensed under the Apache license version 2.0.

This course teaches you basics of AngularJS and its programming concepts. It describes the components of AngularJS with suitable examples

Student should have basic understanding of scripting language such as JavaScript, and any text editor. You should also know the basic web technologies such as HTML, CSS, AJAX etc. for learning to develop web applications using Angular JS

Course Outcomes:

Upon completion of the course, students will be ableto develop single page web applications using Angular JS features and are better equipped to develop dynamic single web page applications with reasonable confidence and ease which helps them to find placements in the job market..

About College:

Sir C.R.Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE).This College is permanently affiliated to JNTUK from the Academic Year 2017-18. Since its inception in 1989, Sir C.R.REDDY College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and management. The last Two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community. Adhering to its core values, the institute gives top priority to ethical values and high standards and a commitment to value based education. We believe in working honestly and sincerely, in building trust and in maintaining a long lasting relationship with the society.

About Department:

Information Technology is the most flourishing and extremely pervasive Discipline that is witnessing an unprecedented Innovation in Technologies for Communication, Computation, and Interactivity. The Information Technology Department in SIRCRRCOE started its journey in the year 2000 with an intake of 60 students. We now have strong Undergraduate Program with an annual intake of 120 students

About The Course:

Nodejs runtime environment has been ranked the technology most commonly used by professional developers. Node. js is an event-driven JavaScript runtime. Node has myriad potential uses for JavaScript development including being a great environment for building efficient network applications.

Developers have embraced Node. js as a strong and adaptable framework for creating server-side applications in recent years. Node. js is essentially a JavaScript runtime framework that allows coders to run JavaScript code independent of a web browser, which makes it perfect for creating scalable, responsive apps.

Course Outcomes:

- Ability To Handle Large Numbers Of Simultaneous Connections
- Uses A Non-Blocking, Event-Driven Architecture
- Allows Developers To Use Javascript Both On The Client And Server-Side
- Node.Js Is Well-Suited For Building Real-Time Applications
- Applications Can Run On Various Platforms Including Windows, Macos, And Linux

Resource Person:

Objectives of the Program:

- To understand and appreciate of Node Js.
- Build scalable and efficient web applications.
- Mastering asynchronous programming, data streaming.
- File system Operations using Express.
- They provide essential functionality for a wide ran of applications and are available out-of-the-box.
- Integrating databases with Node. Js.

Course Contents:

- Node.js Module System
- File System and Command Line Args
- Debugging Node.js
- Asynchronous Node.js
- API Authentication and Security

To

The Principal,

Sir CRReddy College of Engineering,

Eluru.

Respected Sir,

Subject: Permission Request for a one week value added program on "Analog and Digital Sensor Interfacing with FPGA Boards".

I am seeking your approval to launch a one week value added program on "Analog and Digital Sensor Interfacing with FPGA Boards" for IV/IV B. Tech (ECE) students, starting 08-03-2022 to 13-03-2022. This program aims to provide participants with comprehensive insights into advanced Senorrs interfacing with FPGA boards, equipping them with the necessary skills to enhance efficiency and effectiveness in their respective roles.

I kindly request your approval for the execution of this one-week value-added program. Your support is crucial in enabling us to provide this learning opportunity to our participants.

Sincerely,

Principal

ABOUT COLLEGE

Sir C.R.Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE). This College is permanently affiliated to JNTUK from the Academic Year 2017-18.

Since its inception in 1989, Sir C.R.Reddy College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and magnanimous management. The last two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community.

The institution is continuously striving for excellence by adopting changes to improve the systems, practices and performance.

ABOUT DEPARTMENT

The Department of Electronics& Communication Engineering has been functioning since the inception of the College in 1989. The present intake is 180 students in First Year with 10% lateral entry in second year. A new P.G.Course M.Tech. (VLSI) & (CS) was introduced by the department during the Academic year 2010 - 2011. The Department has 34 Teaching Faculty members. Out of this 04 are Doctorates. The Department has excellent Laboratory facilities, Work-Shops, Computer Center.

ABOUT COURSE

Analog and digital sensor interfacing with FPGA boards involves connecting sensors for data capture and processing. Analog sensors require ADCs for signal conversion, while digital sensors connect directly to the FPGA's digital pins. Careful consideration of signal conversion, timing, and processing techniques ensures reliable data acquisition across various applications.

Objectives of Course:

- Understand the principles of analog and digital sensors, including their types, operating principles, and applications in various fields such as robotics, automation, and IoT.
- Gain proficiency in interfacing analog sensors with FPGA boards, including the selection and configuration of analog-to-digital converters (ADCs), signal conditioning techniques, and sampling methodologies to ensure accurate data acquisition.
- Learn FPGA programming techniques for sensor interfacing, including the design and implementation of FPGA logic to interpret sensor signals, perform data processing, and generate appropriate responses or actions.
- Implement Metaheuristic Algorithms: Gain hands-on experience with genetic algorithms and simulated annealing for complex optimization challenges.
- Apply Multi-Objective Optimization: Understand and apply concepts of multi-objective optimization and Pareto optimality in practical settings.

Course Contents

- Programming Concepts using Verilog Hardware Description Language.
- Introduction to EDGE,PYNQ,ZYBO and NEXES A7 FPGA Boards
- Introduction to Virtual IP cores- Block level design
- Hardware interfacing with FPGA boards : BCD-7 Segment Display, Buzzer,BCD-7 Segment Counter, Switch LED, Music Box, Push Button LED, Digital to Analog converter, LED Blinker through bluetooth, Analog to Digital converter, IR sensor

Summary Report on A One Week Value Added Course titled

Title of the course: "Analog and Digital Sensor Interfacing with FPGA Boards"

Duration: 08-03-2022 to 13-03-2022

Resource Persons: K.Pradeep, Sr. Application Engineer
Apply Volt, Vijayawada

About the course

Analog and digital sensor interfacing with FPGA boards involves connecting sensors to the FPGA for data capture and processing. Analog sensors, which measure continuous physical phenomena, require analog-to-digital converters (ADCs) to convert their signals into digital values for FPGA processing, often employing techniques like sample-and-hold circuits and signal conditioning for accuracy. FPGA boards typically include built-in ADC modules or require external ADCs connected via input/output pins. Conversely, digital sensors, representing discrete states or events, are interfaced directly with the FPGA's digital input/output pins, with the FPGA logic programmed to interpret the received digital signals, ensuring accurate data capture and synchronization with the FPGA's clock signals. Both analog and digital sensor interfacing demand careful consideration of signal conversion, timing, and processing techniques to enable reliable data acquisition and processing across various applications.

Course objectives

- understand the principles of analog and digital sensors, including their types, operating principles, and applications in various fields such as robotics, automation, and IoT.
- Gain proficiency in interfacing analog sensors with FPGA boards, including the selection and configuration of analog-to-digital converters (ADCs), signal conditioning techniques, and sampling methodologies to ensure accurate data acquisition.
- Develop skills in interfacing digital sensors with FPGA boards, encompassing the understanding of digital communication protocols (e.g., I2C, SPI), signal synchronization, and timing considerations to facilitate reliable data capture and processing.
- Learn FPGA programming techniques for sensor interfacing, including the design and implementation of FPGA logic to interpret sensor signals, perform data processing, and generate appropriate responses or actions.
- Apply Multi-Objective Optimization: Understand and apply concepts of multi-objective optimization and Pareto optimality in practical settings.

- Explore real-world applications of sensor interfacing with FPGA boards through hands-on projects and case studies, allowing for practical experience in designing, implementing, and troubleshooting sensor interfaces for diverse engineering applications.
- Develop critical thinking and problem-solving skills by analyzing sensor data, optimizing FPGA configurations, and addressing challenges related to signal integrity, noise reduction, and power consumption in sensor interfacing systems.
- Foster collaboration and communication skills through team-based projects and discussions, encouraging peer learning and knowledge sharing among participants with diverse backgrounds and experiences in FPGA programming and sensor technologies.

Course content

- Programming Concepts using Verilog Hardware Description Language.
- Introduction to EDGE,PYNQ,ZYBO and NEXES A7 FPGA Boards
- Introduction to Virtual IP cores- Block level design.
- Hardware interfacing with FPGA boards : BCD-7 Segment Display, Buzzer,BCD-7 Segment Counter, Switch LED, Music Box, Push Button LED, Digital to Analog converter, LED Blinker through bluetooth, Analog to Digital converter, IR sensor

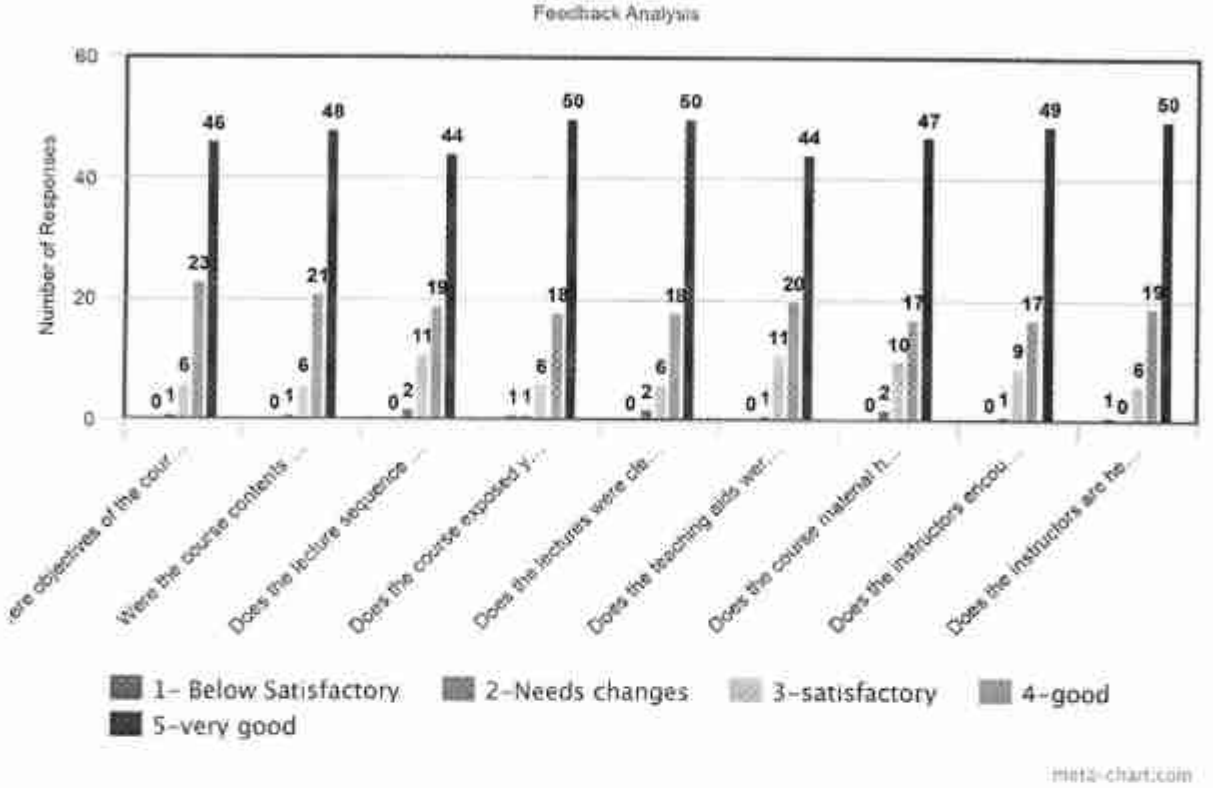
Feedback results:



Feedback analysis

Course Objectives Clarity: A significant majority of the students (46) felt that the objectives of the course were clear to them, rating it as very good. This indicates a strong alignment between the course's aims and students' understanding of those goals.

Meeting Expectations: The majority of respondents (48) reported that the course contents met their expectations, with a smaller group rating it as good (21). This suggests that the course was well-received in terms of its relevance and coverage.

Lecture Sequencing: The sequence of lectures was considered well planned by a large portion of the students (44), indicating effective curriculum design and organization.

Exposure to New Knowledge: The course was highly effective in exposing students to new knowledge and practices, as evidenced by 50 students rating this aspect as very good. This is a critical measure of the course's value addition.

Clarity of Lectures: Most students found the lectures to be clear and easy to understand, with 50 students rating them as very good. This reflects positively on the instructors' delivery methods.

Use of Teaching Aids: The majority of students felt that teaching aids were effectively used (44 rated as very good), though there is a slight indication towards room for improvement based on the mixed ratings received.

Course Material Adequacy: The adequacy of course material was well-regarded, with 47 students finding it to be very good, suggesting that the resources provided were sufficient and relevant.

Instructor Interaction: A large majority of students appreciated the level of interaction encouraged by the instructors (49 rated as very good), highlighting the program's supportive learning environment.

Instructor Support in Clarification: The instructors were perceived as helpful in clarifying doubts, with 50 students rating this support as very good, which is pivotal for effective learning.

Recommendations: Enhance Interaction and Clarification Opportunities: Despite high ratings, continuously seeking ways to increase student-instructor interaction and clarify doubts can further improve learning outcomes.

Review and Improve Teaching Aids: A small proportion of students indicated a need for improvements in the use of teaching aids. Exploring innovative tools and techniques could enhance learning engagement.

Maintain and Build on Strengths: The course's strengths in clarity, sequencing, and exposure to new knowledge should be maintained and built upon in future iterations of the program.

Conclusion: The feedback indicates a highly positive reception of the value-added course among final-year students, with particularly strong outcomes in areas such as course objective clarity, exposure to new knowledge, and instructor support. Moving forward, there's a small margin for enhancement in the use of teaching aids and further fostering of student-instructor interaction. Overall, the program appears to be a significant success, contributing valuable knowledge and skills to the participating students.

Respected sir,

Subject: Request for Permission to Organize a Value Added Program in EEE Department – Reg.

I am requesting your permission to organize a **3-week Value-Added Program** in EEE Department. The 3-week value-added program will be conducted on TOPIC: **Basics to Aurdinuo to II/IV B.Tech (EEE) students,** from 17-1-2022 to 04-02-2022 and is aimed at providing a platform for students to expand their knowledge and understand the latest advancements and developments in that area.

I am confident that this 3-week value added program on Basics to Aurdinuo will be a great success and will contribute significantly to the overall growth and development of our students. So, grant your permission to proceed with the value-added program. I look forward to your positive response.

Thank you sir,

ABOUT THE INSTITUTE

Sir C. R. Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE). This College is permanently affiliated to JNTUK from the Academic Year 2017-18.

Since its inception in 1989, Sir C. R. Reddy College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and magnanimous management. The last two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community.

ABOUT THE DEPARTMENT

Department of Electrical & Electronics Engineering (EEE) offers under graduate (B. Tech.) course in EEE and a post graduate(M.Tech.)

specialization in Power Systems and Automation and is permanently affiliated JNTUK, Kakinada Andhra Pradesh, India. Department of EEE was started in the year 1994 with an intake of 60 students and subsequently enhanced to 90 students. The Department offers M. Tech. specialization for an intake of 18 students.

ABOUT THE COURSE

Arduino is an open-source electronics platform based on easy-to-use hardware and software. It consists of a microcontroller board and a development environment, which allows you to write and upload computer programs to the board. Here are the basics to get started with Arduino: the Arduino IDE: The Arduino Integrated Development Environment (IDE) is a software application used to write and upload code to the Arduino board.

Asst.Professor in Department of Electrical and Electronics Engineering,

Sir C.R.Reddy College of Engineering :
Email:
samba2007pvp@gmail.com,
phone : 9290668708

OBJECTIVES OF THE PROGRAM:·

Get introduced to the Arduino
·Advance your understanding of design, analysis, and development of Projects
·Develop an in-depth understanding coding to Arduino
·Deep dive into the major aspects use Arduino functions for digital input and output.
·Empower your team to design requirements and challenges of the present and future solutions

LEARNING OUTCOMES:

··Learn the Arduino programming language and IDE
·Prototype circuits and connects them to the Arduino
·Connect the Arduino microcontroller to a serial terminal to understand communication and stand-alone use
·Explore the provided example code and resources for extending knowledge.

ELIGIBILITY:

ALL II-B.Tech Students

REGISTRATION FEE:

Students registering for the value added course are not required to pay any fee.

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

SUMMARY REPORT

Value Added Course : "BASICS TO ARDUINO"
Dated : 17-01-2022 to 04-02-2022
Duration: 45 hours (3 weeks)

Resource Persons: SRI B. SAMBASIVA RAO

Objectives of the program:

- Get introduced to the Arduino
- Advance your understanding of design, analysis, and development of Projects
- Develop an in-depth understanding coding to Arduino
- Deep dive into the major aspects use Arduino functions for digital input and output.
- Empower your team to design requirements and challenges of the present and future solutions

Outcomes of the program:

- Learn the Arduino programming language and IDE
- Prototype circuits and connects them to the Arduino
- Connect the Arduino microcontroller to a serial terminal to understand communication and stand-alone use
- Explore the provided example code and resources for extending knowledge.

No. of students completed the course: 154

To
The Principal,
Sir CR Reddy College of Engineering,
Eluru.

Respected sir,.

Subject: Request for Permission to Organize a Value Added Program in EEE Department – Reg.

I am requesting your permission to organize a **3-week Value-Added Program** in EEE Department. The 3-week value-added program will be conducted on TOPIC: **Raspberry Pi Basic to III/IV B.Tech (EEE) students,** from 5-11-2021 to 22-11-2021 and is aimed at providing a platform for students to expand their knowledge and understand the latest advancements and developments in that area.

I am confident that this 3-week value added program on **Raspberry Pi Basic** will be a great success and will contribute significantly to the overall growth and development of our students. So, grant your permission to proceed with the value-added program. I look forward to your positive response.

Thank you sir,

ABOUT THE INSTITUTE

Sir C. R. Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE). This College is permanently affiliated to JNTUK from the Academic Year 2017-18.

Since its inception in 1989, Sir C. R. Reddy College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and magnanimous management. The last two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community.

ABOUT THE DEPARTMENT

Department of Electrical & Electronics Engineering (EEE) offers under graduate (B. Tech.) course in EEE and a post graduate(M.Tech.)

specialization in Power Systems and Automation and is permanently affiliated JNTUK, Kakinada Andhra Pradesh, India. Department of EEE was started in the year 1994 with an intake of 60 students and subsequently enhanced to 90 students. The Department offers M. Tech. specialization for an intake of 18 students.

ABOUT THE COURSE

Raspberry Pi is a small, affordable single-board computer developed by the Raspberry Pi Foundation. It's designed to promote teaching of basic computer science in schools and developing countries. Here are the basics to get started with Raspberry Pi:Get a Raspberry Pi Board: There are several models of Raspberry Pi available, with the latest being Raspberry Pi 4 at the time of writing. Each model differs in terms of features, performance, and connectivity options.

SUMMARY REPORT

Value Added Course : "RASPBERRY PI BASIC"

Dated : 05-11-2021 to 22-11-2021

Duration: 45 hours (3 weeks)

Resource Persons: SRI S.R. SAGAR

Objectives of the program:

- To develop the background knowledge and core expertise of an embedded system design.
- To know the importance of different peripheral devices and their interfacing to rpi board.
- To know the sensor interfacing and its programming.
- To write python programs for rpi for various applications.
- To know the working of different sensors and their use in an embedded systems

Outcomes of the program:

- Interface different sensors and actuators with rpi
- Write programs for rpi using python.
- Understand the various python commands for rpi

No. of students completed the course: *168*

To
The Principal,
Sir CR Reddy College of Engineering,
Eluru.

Respected sir,

Subject: Request for Permission to Organize a Value Added Program in EEE Department – Reg.

I am requesting your permission to organize a **3-week Value-Added Program** in EEE Department. The 3-week value-added program will be conducted on TOPIC: **Renewable Energy(Matlab) Masterclass to III/IV B.Tech (EEE) students,** from 18-4-2022 to 07-05-2022 and is aimed at providing a platform for students to expand their knowledge and understand the latest advancements and developments in that area.

I am confident that this 3-week value added program on **Renewable Energy (Matlab) Masterclass** will be a great success and will contribute significantly to the overall growth and development of our students. So, grant your permission to proceed with the value-added program. I look forward to your positive response.

Thank you sir,

Sincerely,

ABOUT THE INSTITUTE

Sir C. R. Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE). This College is permanently affiliated to JNTUK from the Academic Year 2017-18.

Since its inception in 1989, Sir C. R. Reddy College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and magnanimous management. The last two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community.

ABOUT THE DEPARTMENT

Department of Electrical & Electronics Engineering (EEE) offers under graduate (B. Tech.) course in EEE and a post graduate(M.Tech.)

specialization in Power Systems and Automation and is permanently affiliated JNTUK, Kakinada Andhra Pradesh, India. Department of EEE was started in the year 1994 with an intake of 60 students and subsequently enhanced to 90 students. The Department offers M. Tech. specialization for an intake of 18 students.

ABOUT THE COURSE

A "Renewable Energy Masterclass" using MATLAB could cover a wide range of topics related to renewable energy systems, including modeling, simulation, optimization, and control. Here's an outline for such a masterclass:
Module 1: Introduction to Renewable Energy Systems Overview of renewable energy sources (solar, wind, hydro, biomass, geothermal) Importance of renewable energy in the context of climate change and sustainability.

RESOURCE PERSON:

Dr. V.S.R.Pavan Kumar .N ,
Asso.Professor in Department of Electrical and Electronics Engineering,

Sir C.R.Reddy College of Engineering :
Email:
pavankumar253@gmail.com,
phone : 9703988089

OBJECTIVES OF THE PROGRAM:

··To introduce the MATLAB Software .
·To Impart the Knowledge to the students with MATLAB software. [This enhances programming knowledge for Problem Solving].
·To provide Program provides with the complete illustration of Design of Renewable Energy Sources
·To designed suitably with the inputs from the Industry and Academics
·To design Solar PV Systems , MPPT , Wind Energy Systems and Inverters for the Models .

LEARNING OUTCOMES:

··understanding of the science and engineering issues related to the design and development and installation of Solar PV modules
·familiarize with PV system components and the basic tools for PV module installation.
·enable the student on how to approach for solving problems using MATLAB programs

ELIGIBILITY:

ALL III-B.Tech Students

REGISTRATION FEE:

Students registering for the value added course are not required to pay any fee.

ABOUT RESOURCE PERSON:

Dr. V.S.R.Pavan Kumar .N , Working Asso.Professor in department of Electrical and Electronics Engineering, in, Sir C.R.Reddy College of Engineering. He has 8 years of experience in C.R.Reddy college of Engineering.He had Published 8 Research Publications in Journals ,3 Research Papers in Conferences he had attend 10 Workshops/ FDPs/STTPs

COURSE SCHEDULE

NAME OF THE PROGRAM: RENEWABLE ENERGY (MATLAB) MASTER CLASS

S.NO	DATE	DAY	COURSE SCHEDULE
1	18-04-2022	Monday	Introduction to Solar PV System
2	19-04-2022	Tuesday	Fundamentals of MATLAB - Simulink
3	20-04-2022	Wednesday	Solar PV Panels and Mounting Structure Types and selection of solar modules
4	21-04-2022	Thursday	Selection of Tilt angle, Grounding system PV Shading Effects
5	22-04-2022	Friday	Power Converter Design Non Isolated Power Converter
6	25-04-2022	Monday	MPPT Basics MPPT Design with PO & IC Algorithms, Fuzzy Logic
7	26-04-2022	Tuesday	Types of charge controllers and their selection techniques
8	27-04-2022	Wednesday	Inverter Design Off Grid Inverter Design
9	28-04-2022	Thursday	Design of single line diagram of the PV system using the CAD Tools
10	29-04-2022	Friday	Wind Energy Basics Wind Energy Power System Design
11	02-05-2022	Monday	Solar PV and Wind Energy System Integration
12	03-05-2022	Tuesday	Design of protection of PV system
13	04-05-2022	Wednesday	Solar PV Powered Electric Vehicle System
14	05-05-2022	Thursday	Design and components of the solar water pumping system
15	06-05-2022	Friday	Research Concepts in Renewable Energy System
16	07-05-2022	Saturday	Latest trends in wind energy systems

SUMMARY REPORT

Value Added Course : "RENEWABLE ENERGY(MATLAB) MASTERCLASS"

Dated : 18-04-2022 to 07-05-2022

Duration: 45 hours (3 weeks)

Resource Persons: SRI V.S.R.PAVAN KUMAR .N

Objectives of the program:

- To introduce the MATLAB Software .
- To Impart the Knowledge to the students with MATLAB software. [This enhances programming knowledge for Problem Solving].
- To provide Program provides with the complete illustration of Design of Renewable Energy Sources
- To designed suitably with the inputs from the Industry and Academics
- To design Solar PV Systems , MPPT , Wind Energy Systems and Inverters for the Models .

Outcomes of the program:

- understanding of the science and engineering issues related to the design and development and installation of Solar PV modules
- familiarize with PV system components and the basic tools for PV module installation.
- enable the student on how to approach for solving problems using MATLAB programs

No. of students completed the course: 169

Respected Sir,

Subject: Permission Request for a one week value-added course titled "RobCad Essentials: Training in Simulation and Programming" Program

I am seeking your approval to launch a one week value-added course titled "RobCad Essentials:Training in Simulation and Programming" for III/IV B. Tech (MECH) students, starting 07/03/2022 to 12/03/2022. This program aims to equip our students with simulation and progamming skills, enhancing their employability in the engineering sector.

Your support for this practical and career-oriented initiative is requested. We look forward to your positive response.

Sincerely,

ABOUT COLLEGE

Sir C.R.Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE). This College is permanently affiliated to JNTUK from the Academic Year 2017-18.

Since its inception in 1989, Sir C.R.Reddy College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and magnanimous management. The last two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community.

The institution is continuously striving for excellence by adopting changes to improve the systems, practices and performance.

ABOUT DEPARTMENT

The Department of Mechanical Engineering has been functioning since the inception of the College in 1989. The present intake is 120 students in First Year with 10% lateral entry in second year. A new P.G.Course M.Tech. (Machine Design) was introduced by the department during the Academic year 2010 - 2011. The Department has 24 Teaching Faculty members. Out of this 07 are Doctorates. The Department has excellent Laboratory facilities, Work-Shops, Drawing Halls.

A Siemens Skill Develoment Center with a CNC Lathe Machine, CNC Milling machine and with all advanced welding equipment and processes isfunctioning since 2016.

Another Skill Development center in collaboration with VELJAN HYDRAIR Ltd. & DENISON HYDRAULICS Ltd., Hyderabad is in pipeline with an investment of rupees 1 crore to train the students on advanced Pneumatic and Hydraulic systems.

ABOUT COURSE

This RobCad course offers an in-depth exploration of robotic simulation and programming, covering from basic interface navigation to complex workcell setup and robot modeling. Participants will engage in practical sessions to build workcells, model robots, and utilize advanced simulation techniques including collision detection and sensor integration. Programming within RobCad, from scripting to offline controller integration, prepares attendees for real-world application development. The course culminates in a comprehensive project, allowing learners to apply their skills in a simulated environment before presenting their outcomes, ensuring a bridge between theoretical knowledge and practical application.

Objectives of Course:

- Develop proficiency in RobCad for robotic simulation.
- Master workcell configuration and robot modeling.
- Learn advanced simulation and programming techniques.
- Execute a final project to apply learned skills practically.

Course content

- Introduction to RobCad, focusing on its interface and basic functions.
- Workcell configuration, including practical sessions on setting up a basic workcell.
- Robot modeling techniques and basic simulation strategies like path and motion planning.
- Advanced simulation methods, encompassing collision detection and sensor integration.
- Programming robots within RobCad, covering scripting, offline programming, and controller integration.
- Application development to bridge simulation with real-world scenarios.
- A final project that involves strategy planning, implementation, and presentation, ensuring practical application of the course material.

Summary of Feedback from a one week on "RobCad Essentials: Training on Simulation and Programming" Program

The department of mechanical engineering organized a one week value-added course entitled as RobCad Essentials Training on Simulation and Programming. Feedback was collected from 67 students regarding various aspects such as the technical content, program infrastructure, and other relevant factors. This will be included in the report.

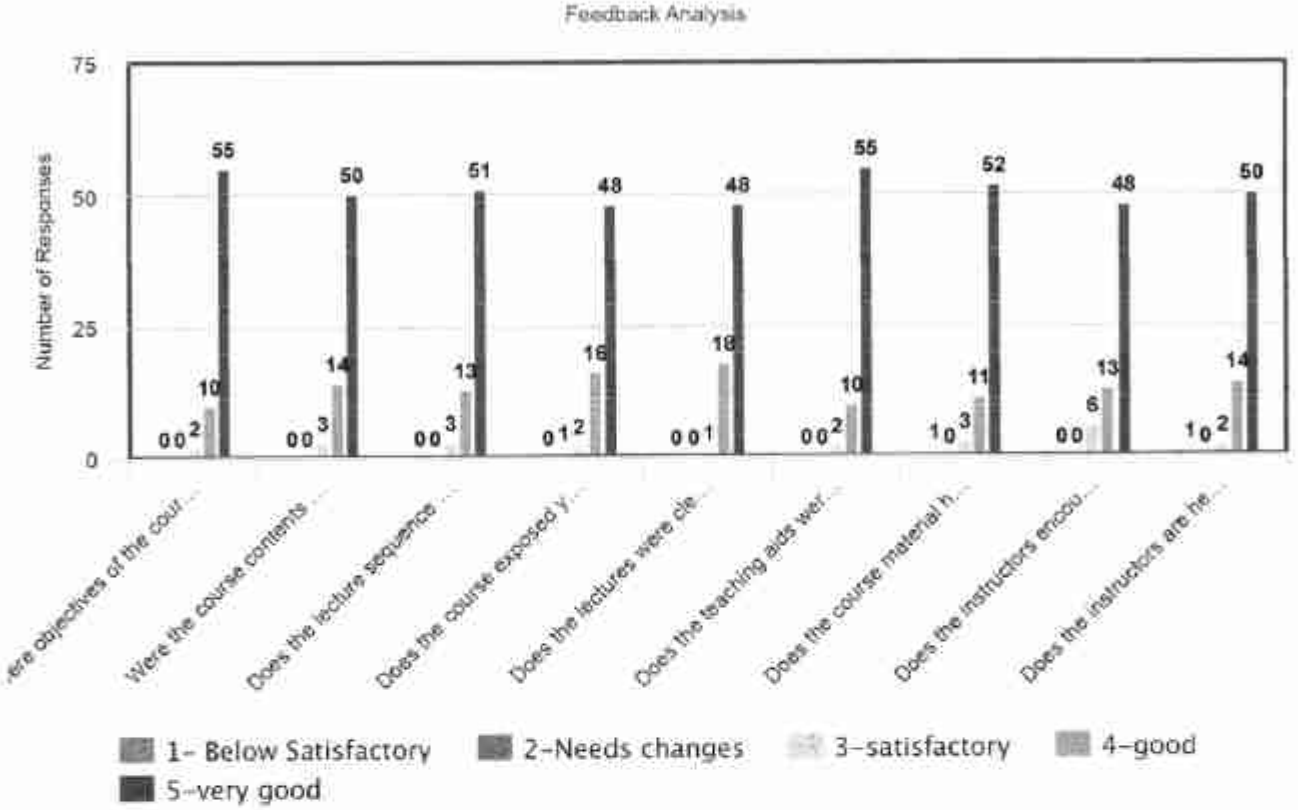
Feedback results:



Feedback analysis

Key Findings:

Course Objectives Clarity: A significant majority of the students (55) felt that the objectives of the course were clear to them, rating it as very good. This indicates a strong alignment between the course's aims and students' understanding of those goals.

Meeting Expectations: The majority of respondents (50) reported that the course contents met their expectations, with a smaller group rating it as good (14). This suggests that the course was well-received in terms of its relevance and coverage.

Lecture Sequencing: The sequence of lectures was considered well planned by a large portion of the students (51), indicating effective curriculum design and organization.

Exposure to New Knowledge: The course was highly effective in exposing students to new knowledge and practices, as evidenced by 48 students rating this aspect as very good. This is a critical measure of the course's value addition.

Clarity of Lectures: Most students found the lectures to be clear and easy to understand, with 48 students rating them as very good. This reflects positively on the instructors' delivery methods.

Use of Teaching Aids: The majority of students felt that teaching aids were effectively used (55 rated as very good), though there is a slight indication towards room for improvement based on the mixed ratings received.

Course Material Adequacy: The adequacy of course material was well-regarded, with 52 students finding it to be very good, suggesting that the resources provided were sufficient and relevant.

Instructor Interaction: A large majority of students appreciated the level of interaction encouraged by the instructors (48) rated as very good), highlighting the program's supportive learning environment.

Instructor Support in Clarification: The instructors were perceived as helpful in clarifying doubts, with 50 students rating this support as very good, which is pivotal for effective learning.

Recommendations: Enhance Interaction and Clarification Opportunities: Despite high ratings, continuously seeking ways to increase student-instructor interaction and clarify doubts can further improve learning outcomes.

Review and Improve Teaching Aids: A small proportion of students indicated a need for improvements in the use of teaching aids. Exploring innovative tools and techniques could enhance learning engagement.

Maintain and Build on Strengths: The course's strengths in clarity, sequencing, and exposure to new knowledge should be maintained and built upon in future iterations of the program.

Conclusion: The feedback indicates a highly positive reception of the value-added course among final-year students, with particularly strong outcomes in areas such as course objective clarity, exposure to new knowledge, and instructor support. Moving forward, there's a small margin for enhancement in the use of teaching aids and further fostering of student-instructor interaction. Overall, the program appears to be a significant success, contributing valuable knowledge and skills to the participating students.

The Principal,

Sir C R Reddy College of Engineering,

Eluru.

Respected Sir,

Subject: Permission Request for a one-week training program on "Precision in Motion: Assembling & Disassembling Direction Control Valves" Program

I am seeking your approval to launch the one-week training program on "Precision in Motion: Assembling & Disassembling Direction Control Valves " for IV/IV B. Tech (MECH) students, starting 21-03-2022 to 26/03/2022 . This program aims to equip our students with practical knowledge and skills, enhancing their employability in the engineering sector.

Your support for this practical and career-oriented initiative is requested. We look forward to your positive response.

NOTICE

The Department of Mechanical Engineering is excited to offer a one-week training program on value-added course titled "Precision in Motion: Assembling & Disassembling Direction Control Valves" scheduled from 21-03-2022 to 26/03/2022. This opportunity is open to B.Tech students in their final years. For those interested in registering or seeking further details, please reach out to DrK.Lalit Narayan, Professor, in the Mechanical Engineering Department.

Venue:

Lecture Hall 19

ABOUT COLLEGE

Sir C.R.Reddy College of Engineering is the first Engineering College in Andhra Pradesh sanctioned and recognized by All India Council for Technical Education (AICTE). This College is permanently affiliated to JNTUK from the Academic Year 2017-18.

Since its inception in 1989, Sir C.R.Reddy College of Engineering has been a premier institute for quality engineering education in Andhra Pradesh under the stewardship of its broad minded and magnanimous management. The last two and a half decades has seen the Institute fulfilling its motto of 'QUALITY SERVICE & VALUE BASED EDUCATION' to the student community.

The institution is continuously striving for excellence by adopting changes to improve the systems, practices and performance.

ABOUT DEPARTMENT

The Department of Mechanical Engineering has been functioning since the inception of the College in 1989. The present intake is 120 students in First Year with 10% lateral entry in second year. A new P.G.Course M.E. (Machine Design) was introduced by the department during the Academic year 2010 - 2011. The Department has 24 Teaching Faculty members. Out of this 07 are Doctorates. The Department has excellent Laboratory facilities, Work-Shops, Drawing Halls.

A Siemens Skill Develoment Center with a CNC Lathe Machine, CNC Milling machine and with all advanced welding equipment and processes isfunctioning since 2016.

Another Skill Development center in collaboration with VELJAN HYDRAIR Ltd. & DENISON HYDRAULICS Ltd., Hyderabad is in pipeline with an investment of rupees 1 crore to train the students on advanced Pneumatic and Hydraulic systems.

ABOUT COURSE

Fluid power is the muscle of the industry used to push, pull, regulate, or drive virtually all the machines of modern industry. Hydraulics and pneumatic machines are the backbones of a range of industries including manufacturing, construction, mining, oil & gas. This course explores the design, construction, operation and maintenance and troubleshooting of these most versatile machines.

Students will obtain a comprehensive overview of all aspects related to the construction, design, operation, and maintenance of hydraulic and pneumatic systems. Students will develop the requisite knowledge and skills to interpret, design and troubleshoot simple hydraulic and pneumatic circuits. Course content includes concepts related to pressure and flow; the operation of hydraulic and pneumatic system components – such as actuators and control valves; simple circuits for hydraulic and pneumatic applications. Hence this course is essential in engineering and technology to cope in modern industry to tackle a variety of problems and search for better solutions in power transmission and control.

Objectives of Course:

- Understand the Components & working function of hydraulic and pneumatic drive system
- Know how the components are selected and integrated into a system
- Understand the operation of basic circuits, and Know how to read basic circuits, troubleshoots and analyze .

Course Contents

- Introduction to hydraulic and pneumatic and Basics
- Basic Concepts of motion controllers
- Hydraulics drive system
- Pneumatic drive system
- Solenoid direction control valves
- Troubleshoot of hydraulic and pneumatic drive system

Course schedule on one-week training program on value-added course titled "Precision in Motion: Assembling & Disassembling Direction Control Valves"

S.No.	Date	Timings	Topic
1	21/03/2022	09:00 to 11:00	**Introduction to Control Valves**: Overview of Pressure Control, Chuck, Seat, and Flow Control Valves.
		11:10 to 1:00	**Session 1: Pressure Control Valves** - Theory, assembly, and disassembly techniques.
		1:50 to 2:50	**Session 2: Chuck Valves** - Understanding operation, maintenance, and hands-on assembly/disassembly.
		3:00 to 5:00	**Session 3: Practical Exercise on Chuck Valves** - Workshop for skill application.
2	22/03/2022	09:00 to 11:00	**Session 1: Seat Valves** - Detailed exploration of seat valve mechanisms and maintenance.
		11:10 to 1:00	**Session 2: Workshop on Seat Valves** - Assembling and disassembling seat valves.
		1:50 to 5:00	**Session 3: Flow Control Valves** - Introduction and operational principles.
3	23/03/2022	09:00 to 11:00	**Session 1: Advanced Techniques in Flow Control** - Adjusting for precision flow management.
		11:10 to 1:00	**Session 2: Hands-on with Flow Control Valves** - Practical application in control systems.
		3:00 to 5:00	**Session 3: Comprehensive Valve Maintenance** - Strategies for long-term upkeep and efficiency.
4	24/03/2022	09:00 to 11:00	**Review and Advanced Topics** - Revisiting key concepts with advanced troubleshooting scenarios.
		11:10 to 1:00	**Session 2: Complex Valve Systems** - Integrating multiple valve types in complex systems.
		1:50 to 5:00	**Session 3: Capstone Project** - Designing and executing a project incorporating learned skills.
5	25/03/2022	09:00 to 11:00 11:10 to 1:00	**Session 1: directional Control Valves** - Theory, assembly, and disassembly techniques.
		1:50 to 5:00	**Session 2 :** Practice With 2/2,2/3,4/2 Dcv
6	26/03/2022	09:00 to 11:00	**Project Presentation & Feedback** - Participants present their projects with peer and instructor feedback.
		11:10 to 1:00	**Certification Preparation** - Reviewing course material and preparing for certification.
		1:50 to 2:50	**Final Review and Q&A** - Addressing any last queries and consolidating knowledge.
		3:00 to 5:00	**Closing Ceremony and Certification** - Awarding certificates and concluding remarks.

Summary of Feedback from a one-week training program on "Precision in Motion: Assembling & Disassembling Direction Control Valves" Program for Final-Year Students

The department of mechanical engineering organized a six-day training program focused on a value-added course, incorporating plant simulation training. Feedback was collected from 77 students regarding various aspects such as the technical content, program infrastructure, and other relevant factors. This will be included in the report.

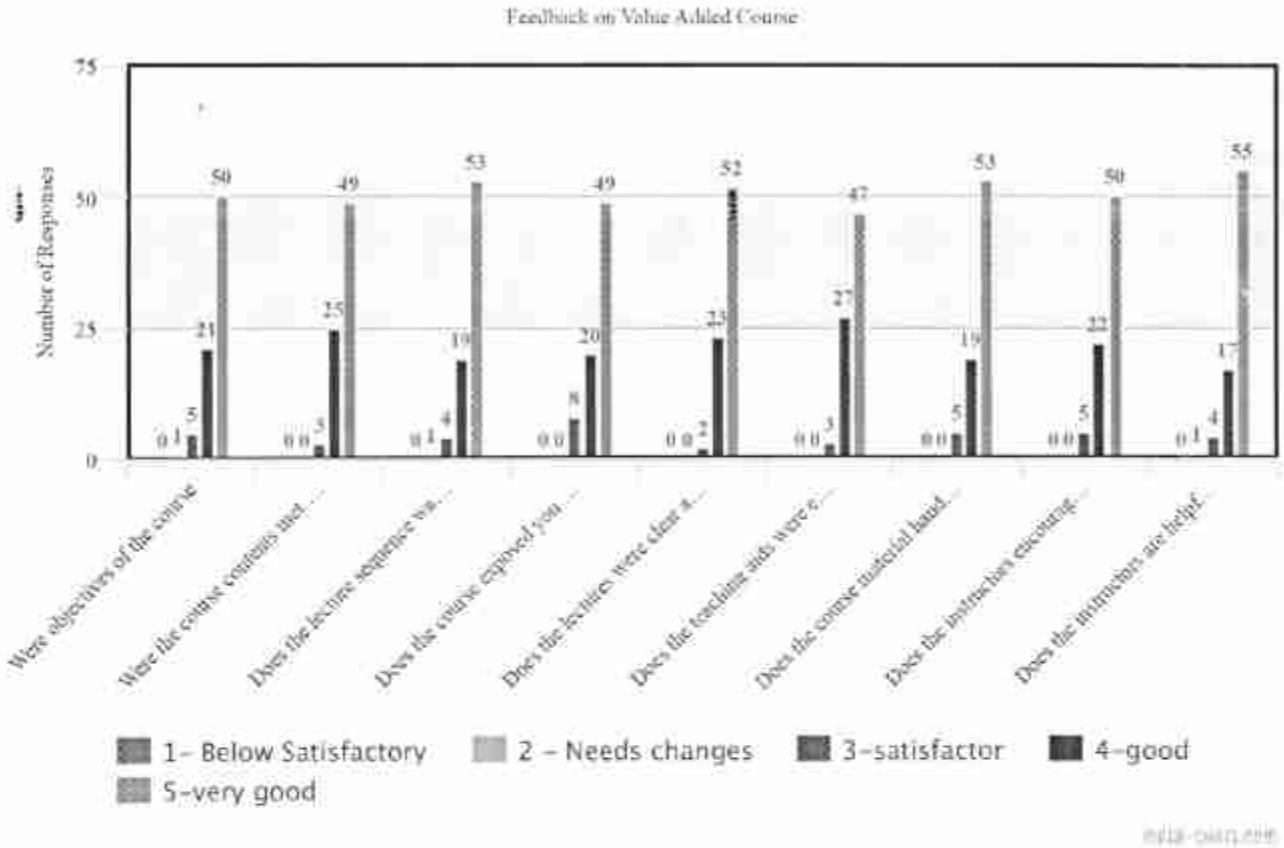
Feedback results:



Feedback analysis

Key Findings:

Course Objectives Clarity: A significant majority of the students (50) felt that the objectives of the course were clear to them, rating it as very good. This indicates a strong alignment between the course's aims and students' understanding of those goals.

Meeting Expectations: The majority of respondents (49) reported that the course contents met their expectations, with a smaller group rating it as good (25). This suggests that the course was well-received in terms of its relevance and coverage.

Lecture Sequencing: The sequence of lectures was considered well planned by a large portion of the students (53), indicating effective curriculum design and organization.

Exposure to New Knowledge: The course was highly effective in exposing students to new knowledge and practices, as evidenced by 49 students rating this aspect as very good. This is a critical measure of the course's value addition.

Clarity of Lectures: Most students found the lectures to be clear and easy to understand, with 52 students rating them as very good. This reflects positively on the instructors' delivery methods.

Use of Teaching Aids: The majority of students felt that teaching aids were effectively used (47 rated as very good), though there is a slight indication towards room for improvement based on the mixed ratings received.

Course Material Adequacy: The adequacy of course material was well-regarded, with 53 students finding it to be very good, suggesting that the resources provided were sufficient and relevant.

Instructor Interaction: A large majority of students appreciated the level of interaction encouraged by the instructors (50 rated as very good), highlighting the program's supportive learning environment.

Instructor Support in Clarification: The instructors were perceived as helpful in clarifying doubts, with 55 students rating this support as very good, which is pivotal for effective learning.

Recommendations: Enhance Interaction and Clarification Opportunities: Despite high ratings, continuously seeking ways to increase student-instructor interaction and clarify doubts can further improve learning outcomes.

Review and Improve Teaching Aids: A small proportion of students indicated a need for improvements in the use of teaching aids. Exploring innovative tools and techniques could enhance learning engagement.

Maintain and Build on Strengths: The course's strengths in clarity, sequencing, and exposure to new knowledge should be maintained and built upon in future iterations of the program.

Conclusion: The feedback indicates a highly positive reception of the value-added course among final-year students, with particularly strong outcomes in areas such as course objective clarity, exposure to new knowledge, and instructor support. Moving forward, there's a small margin for enhancement in the use of teaching aids and further fostering of student-instructor interaction. Overall, the program appears to be a significant success, contributing valuable knowledge and skills to the participating students.

DEPARTMENT OF MANAGEMENT STUDIES

Summary Report on Four Week Value Added Course "GLOBAL HR PRACTICES"

Date: 13-12-2021 to 07-01-2021

Resource Persons: Mrs.CH.Madhavi Latha, Assistant Professor.

Email id: krkpaints@gmail.com

Contact Number:9490989007

Name of the coordinator: N.Satish, Assistant Professor

Venue : MBA HR Class

No. of students attended the course: 26

Objectives of the program:

- Global HR is how international employers manage geographic, linguistic and cultural differences amongst their workforce to achieve maximum productivity and engagement.
- HR policies can support trust, fairness and inclusion by outlining the responsibilities of both employer and employee. They can impact employee motivation, organisation reputation and the ability to attract and retain talent, creating mutual benefits for employees and organisations.
- The functions of human resource management include planning, recruiting, selecting, on boarding, and placement.
- As an HR professional, a good global HR practice is to give the underperforming employee a chance to change.

Outcomes of the program:

- One of the most interesting and possibly best-known aspects of the Harvard HRM Framework is the list of HR outcomes (the 4Cs): Commitment, Congruence, Competence and Cost-effectiveness.
- Building and maintaining company culture
- It drives employee engagement, job satisfaction and staff retention, and it defines business success. HR plays a key role in developing, reinforcing and changing the culture of an organisation.
