Good Morning Sir,

Please allocate slot for a **one day workshop** on "**Recent trends in Mechanical Engineering – A Research Perspective**" on 10-08-2018 for II/III/IV B.Tech Students of Sir C R Reddy college of Engineering in offline mode.

Thanks & Regards,

Dr. K. Rambabu

Professor,

Dear Sir/Mādam,

I feel excited to welcome you to the "Recent trends in Mechanical Engineering – A Research Perspective". I can attend the Program which is going to happen on 10-08-2018.

Thanks & Regards,

Mr. P. Rajesh,

Assistant Professor,

Department of ME,

Eluru college of Engineering and Technology

RESEARCH DESIGNS ASSOCIATED WITH QUANTITATIVE AND QUALITATIVE RESEARCH

Types of Quantitative and Qualitative Research Designs and Their Primary Uses

SIR C R REDDY COLLEGE OF ENGINEERING, ELURU.

DEPARTMENT OF MECHANICAL ENGINEERING

**A One-Day Workshop on "Recent trends in Mechanical Engineering – A
Research Perspective"**

REPORT

Academic Year: 2018-19

Date:10.08.2018

Basic information about the workshop:

Title of the workshop : A One-Day Workshop on "Recent trends in
Mechanical Engineering– A Research Perspective"

About the resource person : "**P Rajesh**, Assistant Professor,
Department of Mechanical Engineering,
Eluru College of Engineering & Technology, Duggirala"

Stakeholders : All the students of II/III/IV B. Tech. Mechanical
Engineering.

Background of the Stakeholder : Stakeholders are UG students who have the basic
knowledge of Mechanical Engineering.

Objectives:

Now a days mechanical engineers need to upgrade their skills with the latest trends such as technology in automation, 3D printing, Robotics etc. The objective of this workshop will enable the students to learn advances in technology, new materials and innovative ideas in the fields of Automation, 3D printing, Robotics, Artificial intelligence, Nanotechnology, Computer-Aided Engineering, Internet of Things. Technology has enabled mechanical engineers to develop more efficient and effective solutions to complex problems.

Inauguration: Started at 10.00 AM

Attended Delegates:

CHIEF GUESTS

SRI JASTI MALLIKARJUNUDU, Correspondent, Sir C.R. Reddy College of Engineering

SRI HARI RAMA HRISHNAM RAJU, Managing Committee & Designated

Representative, Sir C.R Reddy College of Engineering

GUESTS OF HONOR

Dr. G SAMBASIVA RAO, Principal, Sir C.R. Reddy College of Engineering

Dr.K.VENKATESWARA RAO, HOD, Department of ME, Sir C.R.Reddy College of

Engineering

RESOURCE PERSON: **Sri P Rajesh**

Forenoon Session: Started at 10.45 AM

Growth of Additive Manufacturing:

Additive manufacturing, known colloquially as 3D printing, is reshaping manufacturing practices globally. This growth will continue to impact the mechanical engineering sector, especially with the push toward creating sustainable materials and flexible systems for on-demand 3D printing. Current mechanical engineers and those looking to work in the field in the future can all benefit from this growing trend by focusing on design for additive manufacturing (DfAM) skills.

New Uses for CAD:

Computer-aided design or CAD isn't a new trend. It's a tried and true system that mechanical engineers have used for decades. How engineers can apply this software is changing in 2023 and beyond. Instead of just using it for design, it has become a tool for everything from performance simulations and stress tests to generative design and digital twinning, which we'll talk more about in a moment. Engineers who have already honed their CAD skills will find new applications for this software in the coming years. Keep your eyes out for newer CAD versions and unique new ways to use this mechanical engineering staple in the coming years.

Adopting Digital Twin Technology:

Physical models and prototypes have been an industry standard for decades, but they can take time and effort to create. You also often find yourself drowning in prototypes as you make small changes to the design. Digital twinning is gaining popularity as a tool to reduce the number of physical prototypes necessary to complete a project. A digital twin is a virtual model that accurately represents an item in the physical world. If you could put the two side by side, there should be no discernable differences between them. The digital twin can be equipped with virtual sensors, allowing mechanical engineers to put their products through stress and performance tests without creating a new prototype for each test. All the information collected in the digital space can be used to perfect the twin in the physical world.

Lunch Break: From 1.00 PM to 2.00 PM

Afternoon Session: Started at 2.15 PM

Green Engineering:

Sustainability is a buzzword on the tip of everyone's tongue in 2022. Countries are looking for new and innovative ways to reduce their CO2 emissions and carbon footprint. If they hope to avert a looming climate crisis, humanity must come together to reduce its CO2 emissions by 40% before 2030. They also need to reach the goal of net zero emissions before 2050. It's a lofty but achievable goal if companies and corporations start making the necessary changes. One of the many ways the world works to achieve this goal is by

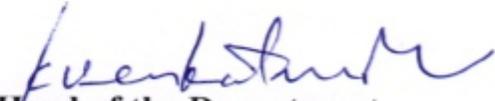

leaning more heavily onto subjects like eco-engineering. Mechanical engineers looking for a change could consider shifting to this eco-friendlier field. Even without that career shift, there is a growing movement for engineers to create and embrace the kind of green engineering technologies that will move to reshape the industry in the coming decades.

Smart System and Automation:

Automation is another facet beginning to heavily influence most engineering and manufacturing sectors. Here, more traditional mechanical engineers may start to struggle. A second degree in software engineering isn't necessary, but some programming knowledge can come in handy when adopting automation and smart systems. Automation is becoming a valuable tool for taking over tedious, monotonous or dangerous tasks in the field. Instead of putting a human worker at risk, an automated system can complete the same job. The robotics necessary to implement these systems fall firmly in the mechanical engineering sector. Who hasn't dreamed of building robots to handle mundane tasks like passing the butter?

More Applications for IIoT:

The Internet of Things is growing exponentially. In 2021, there were more than 27 billion devices connected to the IoT, a number that will continue to climb in the coming years. Beyond the smart technology that people are installing in their homes lies the Industrial Internet of Things (IIoT), where mechanical engineering will come into play. Installing IIoT systems relies heavily on communication between old machinery and new sensors. Overcoming the tech gap between the two can be a challenge, especially for companies using the same equipment for decades. Mechanical engineers will need to work with other teams to make the most of machine-to-machine communication and improve IIoT adoption in the workplace in the coming years.

EVENT ORGANIZED REPORT (2018-19)

Name of the department	Information Technology
Name of the event organized	Seminar
Title of the event	Entrepreneurship Opportunities in E-Waste Recycling
Date of event organized	22/8/2018
Name of the staff coordinator	B Lalitha Bhavani
Target audience/participants	STUDENTS
Number of participants	100
Name of the expert with designation	SRINIVAS PISUPATI President, Technogen inc,Hyderabad
Objective of the event	Highlights the state of entrepreneurship opportunities in managing E-waste from multiple frameworks. E-waste is growing faster than any other waste stream, driven by a growing electronics market and the rising obsolescence rate of electronic equipment. An e-waste recycling business is green business opportunity that helps conserve world's resources that would otherwise be spent on the manufacture of recovered substances. E-waste refurbishing and recycling work hand-in-hand in the value chain and overall, the opportunities for growth in the e-waste management industry must coincide with strong public awareness on the environmental, health and economic issues. Once all of the market, technical processing, and management research has been done, the entrepreneur must combine this accrued wealth of knowledge with a desire to work with the community.
Outcome of the event	The Seminar includes both Statistical research as well as Field notes. Statistical

research in the study describes how e-waste entrepreneur could tap e-waste from the major sources. Field notes explain many opportunities available for e-waste entrepreneur in processing and minimizing the e-waste and some avenues for e-waste disposal. The findings are drawn on considering E-waste as both a crucial environmental issue and economic opportunities in managing e-waste.

TELANGANA.

Dear Sir,

Sub.: Invitation request for Guest lecture on 17th September 2018 – Reg.

This is with reference to the telephonic conversation of our faculty had with you; We are arranging a Guest Lecture on 17-09-2018, on a topic of your choice, in the Department of Electrical & Electronics Engineering, Sir C R Reddy College of Engineering, Vatluru, Eluru, West Godavari Dist., A.P.. T.A and honorarium will be paid for the visit with local hospitality. Kindly inform about your travel plans to make necessary arrangements.

Thanking you Sir

Yours Sincerely

m

DEPARTMENT OF MANAGEMENT STUDIES

Programme Report

Name of the activity	: ENTREPRENEURSHIP AWARENESS
Resource person	: SriK. Ajay Kumar I.R.S, Principal Commissioner of Income Tax (Retd), Present C.E.O of HEAL, Gannavaram
Date & Time	: 11.12.2018 by 10.30 A.M at A/C Seminar Hall
No.of participants	: 80

As a part of department of MBA, Sir CRR College of Engineering, Eluru organized workshop on "ENTREPRENEURSHIP AWARENESS" on 11.12.2018

The objective of the workshop: -The main objective of this workshop is to create awareness among students of various facets of Entrepreneurship as an alternative career option.

The resource person shared the following points to make them as successful entrepreneur. As a part of the department of MBA, Sir CRR College of Engineering, Eluru organized a workshop on "ENTREPRENEURSHIP AWARENESS" on 11.12.2018

The objective of the workshop: -The main objective of this workshop is to create awareness among students of various facets of Entrepreneurship as an alternative career option.

The resource person shared the following points to make them as successful entrepreneurs.

- 1 He stressed how crucial entrepreneurship is in the current environment.
- 2 He inspired the students by telling them about the numerous entrepreneurs who have found success.
3. He shed emphasis on the significance of moral and ethical principles in business.
4. He also responded to the queries that the students had posted.

About 80 students attended the event. The speaker responded very well to the students' questions. The overall response to the workshop was quite positive.

EVENT ORGANIZED REPORT (2018-19)

Name of the department	Computer Science and Engineering
Name of the event organized	Seminar
Title of the event	One Day Seminar on "Technological Innovations in Entrepreneurship"
Date of event organized	22-12-2018
Name of the staff coordinator	Dr. M. Krishna, Professor
Target audience/participants	II/IV B.Tech (CSE)
Number of participants	177
Name of the expert with designation	Dr.k.v Sridhar Professor Department MBA Sir C R REDDY college of engineering
Objective of the event	<ul style="list-style-type: none">• Apply new ideas, methods and ways of thinking.• Engage with a range of stakeholders to deliver creative and sustainable solutions to specific problems.• Communicate effectively both orally and in writing.• Work effectively with colleagues with diverse skills, experiences and be able to critically reflect on own practice.
Outcome of the event	<ul style="list-style-type: none">• understand the issues around defining 'technology', 'innovation' and 'innovation management'• recognise the diversity of types of innovation, innovators and innovation settings• understand the nature and extent of technological change and innovation• critically assess and explain key current issues in our understanding of innovation as a field of study.

EVENT ORGANIZED REPORT (2018-19)

Name of the department	Information Technology
Name of the event organized	Seminar
Title of the event	Innovation in to a Startup and IPR
Date of event organized	22/01/2019
Name of the staff coordinator	N Prasad
Target audience/participants	Faculty
Number of participants	18
Name of the expert with designation	SUNDRAM P Senior software developer, ORACLE CORP, CHENNAI
Objective of the event	This seminar explains the interplay between startups and Intellectual Property Rights, emphasizing the benefits to start-ups upon receiving intellectual property protection. Discuss the important Intellectual Property Rights that affect startups that are, patents, trademarks, industrial designs and trade secrets.
Outcome of the event	Start-ups are disruptors that bridge the gap between a problem and solution by offering novel and innovative measures to solve the problem. They develop their own unique product or service and provide it at a reasonable cost and such innovations are creations of the intellect. It, therefore, becomes pertinent to protect the intellectual property of these start-ups to ensure their success

DEPARTMENT OF MECHANICAL ENGINEERING

A One-Day Workshop on "Building Awareness on Intellectual Property Rights"

REPORT

Academic Year: 2018-19³

Date: 15-02-2019

Basic information about the workshop:

Title of the workshop : **A One-Day Workshop on "Building Awareness on Intellectual Property Rights"**

About the resource person : **M Karthik, Assistant Professor, SVECW.**

Stakeholders : All the students of II/III/IV B. Tech - Mechanical Engineering.

Background of the Stakeholder : Stakeholders are UG students who have the basic knowledge of Mechanical Engineering.

Inauguration: Started at 09:30 AM

Forenoon Session: Started at 09:40 AM

Lunch Break: From 1.00 PM to 2.00 PM

Afternoon Session: Started at 2.15 PM

Valedictory: Started at 04:45 PM

Feedback and Recommendations: 4:50 PM

About The IPR Workshop:

Intellectual Property Rights (IPR) plays a vital role in enhancing the socio-economic prosperity of the country. Creativity and innovation are new drivers of the world economy. With the increasing relevance of Intellectual Property (IP) in this era of globalization, it is important to recognize the role which IP systems play in the growth of the Nation. Thus, there is a need to create large public awareness about the pivotal role of IPR in globalized knowledge economy. With the view to create awareness on the significance of IPR to the people, Sir C R Reddy College of Engineering is organizing a one day Workshop on Intellectual Property. The Workshop is intended to cover various aspects of IPR like Patents, Copyrights, Trademarks, etc.

Introduction:

Intellectual property is a category of property that includes intangible creations of the human intellect, and primarily encompasses copyrights, patents, and trademarks. It also includes other types of rights, such as trade secrets, publicity rights, moral rights, and rights against unfair competition. Artistic works like music and literature, as well as some discoveries, inventions, words, phrases, symbols, and designs can all be protected as intellectual property. The main purpose of intellectual property law is to encourage the creation of a wide variety of intellectual goods. An intellectual property right refers to the general term for the assignment of property rights through patents, copyrights and trademarks. These property rights allow the holder to exercise a monopoly on the use of the item for a specified period.

Sessions of the Workshop:

The workshop was carried out in 3 sessions. The speaker & the guest of honour M Karthik, Assistant Professor, SVECW, Bhimavaram.

First session:

The introductory session was taken by the speaker. In this session, a complete introduction on intellectual properties, intellectual property laws & their clauses. In this session, the students were taught about the Awareness of Intellectual Property Rights. Also the students were given enough information about how to use this knowledge to proceed forward in a startup company. Also they have been taught Significance of Intellectual Property for Small and Medium Enterprises.

Significance of Intellectual Property for Small and Medium Enterprises (SMEs):

Small & Medium Enterprises are the pillars of the Indian manufacturing sector and have become significant in the stable monetary growth of India. There are more than lakhs of SME units in India with investment of above Rs. 1 lakh crore. The sector has recorded strong growth during the past five years and contributes approx. 40 per cent to industrial production and 6 percent to country's GDP. Approximately 70 percent of the employment growth comes from the SMEs in the Asian region and they contribute towards 90% of industrial units in India and 40% of value addition in the manufacturing sector. In India they accounts for 90% of the industrial units in India. As the name suggest these businesses are varied from small organization and trading concerns to large retail chains. According to the estimate, there are over 13 million SMEs in India providing employment to 42 million peoples.

Due to these reasons it is vital for these companies to invest in their own IPR by adopting unique trademarks and brand names, every trader can create a strong recall value and a position for its product and/or service in the market.

Second session:

Complete information on intellectual properties like patent, copyright, trademark, design, trade secret etc was given. Also the speaker explained the difference between these topics, also the validity for each right, judicial law available under each right & the limitations of each right.

Copyright: Copyright is a legal term describing rights given to creators on their literary and artistic works.

Related Rights: Rights granted by law to communicators of works to the public.

- Performers
- Broadcasting Organizations

Performer's Rights: It includes recording, broadcasting and communicating to the public of a live performance with duration is about 50 years.

Rights of Broadcasting Organizations: It includes Broadcast Reproduction Right. It mainly focuses on Re-broadcasting, Recording and Communicating to the Public of a Broadcast. It has duration of about 25 years.

Patent: A patent is an exclusive right granted for an invention, which is a product or a process that provides a new way of doing something, or offers a new technical solution to a problem. The limited monopoly right granted by the state enables an inventor to prohibit another person from manufacturing, using or selling the patented product or from using the patented process, without permission with time period of about 20 years.

Trademark: A trademark is a distinctive sign which identifies certain goods or services as those produced or provided by a specific person or enterprise.

Layout Design: It includes layout of transistors and other circuit elements, including lead wires connecting such elements and expressed in any manner in a Semiconductor Integrated Circuit (IC).

Trade secret: Some inventions, data, information cannot be protected by any of the available means of IPRs. Such information is held confidential as a trade secret. Trade secret can be an invention, idea, survey method, manufacturing process, experiment results, chemical formula, recipe, financial strategy, client database etc.

The protection of plant varieties and farmers' rights: The Protection of Plant Variety and Farmers Right Act, 2001 (PPVFR Act) is an Act of the Parliament of India that was enacted

to provide for the establishment of an effective system for protection of plant varieties, the rights of farmers and plant breeders, and to encourage the development and cultivation of new varieties of plants.

Third session:

The session began with explaining the various aspects of copy right. Discussed in detail about the topics like 'What is copyright?' What do we mean by author or creator?' Originality of Literary works, Judicial decisions (Copyright in judgments produced by courts vs government) etc. He concluded the session by discussing about Trademark", "Service Mark and Collective mark. His presentation was much informative as cited interesting case studies.

At the end of third session,an activity for the students was conducted, where students were given an activity to come up with an innovative idea, solution & presentation for the given problem statements. Also the students were needed to inculcate how the students can use the above taught intellectual property rights, claim the benefits & get security in their startups.

The third session was ended at 04:45 P.M

The workshop was concluded by the valedictory session which was undergone in presence of Dr.M.B.S.V. Prasad, Secretary and Dr. G SambasivaRao, Prinicpal of the college, where each participant was awarded by a certificate of participation.
