Webinar Report

Summary Report:

Webinar on Research paper Writing for a Scientific Journal was conducted and organized by our IEEE SIRCRRCOE Student Branch on 01st April 2023 @ 07:00 PM to 08:30 PM. The main motto of this webinar of writing a research paper is to encourage students to understand and do research on the specific domain that they are interested in and to participate in the "IEEE R10 Student Research Paper Contest".

The event was started by inviting speaker Dr. Ch. Hima Bindu. She explained about the research paper and the need of writing a research paper. Important points and ways of writing the research paper are clearly explained by the speaker. Speaker gave references for the research paper writing. She also provided information and websites regarding writing and publishing the research papers by the students.

We also thank IEEE Students Portal and IEEE Virtual Speakers Bureau Committee for accepting our request and providing the speaker according to our requirements.

The workshop was success. Each member participated and seemed to enjoy themselves. We met our stated learning objectives. The participants varied from very little familiarity with electronics and programming to near expert. Even with the disparity everyone could complete the most of the task and everyone needed help at some point. The participants were expected to try on their own first and initially attempt to troubleshoot problems. This caused a little frustration in a couple people, but overall it seemed to go well. We had one helper to six students and this level of interaction was really necessary to stay on time. The workshop lasted six hours per day and it is conducted for two days and it was tight, but we finished on time.
