The goal of the CSE department's "Advances in Software Engineering " lectures was to give students the knowledge and abilities of Software Engineer that they would need to be successful in the future. You will significantly advance your career goals in the two hours of instruction. You will also set personal objectives and goals. Hard skills include technical proficiency in software development methodologies, cloud computing, and data analytics. A well-established network can help you connect with industry experts. Finally, resilience in difficult circumstances can help you find the drive to succeed.

Acknowledgements:

The students are expressing their gratitude for the chance to attend your lectures and stating that they think the skills and knowledge they have gained would be crucial for their success in the next competitive tests. The way you methodically handled your own goals and objectives, the way you patiently answered our questions, and the way you clearly communicated complex ideas all increased my grasp of the subject matter. The Principal and Management appreciated the team's work.

About The IPR Workshop:

Intellectual Property Rights (IPR) plays a vital role in enhancing the socio-economic prosperity of the country. Creativity and innovation are new drivers of the world economy. With the increasing relevance of Intellectual Property (IP) in this era of globalization, it is important to recognize the role which IP systems play in the growth of the Nation. Thus, there is a need to create large public awareness about the pivotal role of IPR in globalized knowledge economy. With the view to create awareness on the significance of IPR to the people from various sectors in the Country, Sir C R Reddy College of Engineering is organizing a one day Workshop on Intellectual Property. The Workshop is intended to cover various aspects of IPR like Patents, Copyrights, Trademarks, etc.

Introduction:

Intellectual property is a category of property that includes intangible creations of the human intellect, and primarily encompasses copyrights, patents, and trademarks. It also includes other types of rights, such as trade secrets, publicity rights, moral rights, and rights against unfair competition. Artistic works like music and literature, as well as some discoveries, inventions, words, phrases, symbols, and designs can all be protected as intellectual property. The main purpose of intellectual property law is to encourage the creation of a wide variety of intellectual goods. An intellectual property right refers to the general term for the assignment of property rights through patents, copyrights and trademarks. These property rights allow the holder to exercise a monopoly on the use of the item for a specified period.

Sessions of the Workshop:

The workshop was carried out in 3 sessions. The speaker & the guest of honour M Karthik, Assistant Professor, SVECW, Bhimavaram.

First session:

The introductory session was taken by the speaker. In this session, a complete introduction on intellectual properties, intellectual property laws & their clauses.
